

IZABELA MARCINKOWSKA

FULLSTACK DEVELOPER

I'm a Full-stack JavaScript Developer who loves diving into backend code and working with others to create great things. My strengths are in building smooth and user-friendly applications using React, Node.js, TypeScript, and JavaScript. I've got a good handle on working in Agile teams and really enjoy the collaboration part of it. My time at SALT School, along with my varied background in management, has taught me a lot about tackling tech challenges and working well with all kinds of people. I'm all about connecting tech with real-life needs, and I'm excited to bring this mix of skills and a friendly, team-focused approach to a new role.

EDUCATION & TRAINING

Full Stack Java Script - School of Applied Technology </salt>

2023 - 2024

Intensive training program for full stack web development with a focus on TDD, mob programming and applied learning.

Municipal Adult Educations(Komvux), Sweden

2023

I dived into C#, PHP, Web Development, and Network Technology. I notably developed an application using the Spotify API and honed my skills in technical documentation, enriching my project work.

WORK EXPERIENCE

Floor Manager - Nordic Wellness AB

2020 - 2022

Managed recruitment, training, and development of staff. Oversaw club operations including ordering, reporting, financial management, and customer service. Skilled in staff scheduling using Quinyx, invoice management with Palette System, and reception duties. Experienced in personnel administration, sales, payroll, customer service, and proficient in Microsoft Office.

HR Manager - Always Fitness 24 AB

2017 - 2020

Managed the full recruitment cycle, staff training, and development. Handled administrative tasks and served as the liaison with authorities and partners. Oversaw payroll and scheduling for over 25 employees, and provided customer service. Skilled in HR administration, payroll management, and customer support.

Customer Service Viasat - Webhelp Sweden AB

2017

Handled customer service for administrative and technical queries, drove sales of extended packages and products, and managed customer satisfaction within the NPS department, focusing on improving experiences for low-satisfaction customers.
